Progress Application Server for OpenEdge
Progress Kendo UI

COUNTRY
Denmark

CHALLENGE

Offering a solution that meets the needs of the modern work environment, from GDPR requirements to mobility.

SOLUTION

OpenEdge 11.7

An app development platform that enables Mark Information to embrace the latest tech trends.

PAS for OpenEdge

A modern application server that plays a pivotal role in Mark Information's modernization efforts.

Kendo UI

A complete UI toolbox for crafting slick user experiences across web and mobile platforms.

RESULTS

Reduced time spent on low-level work, enabling developers to focus on creating value for customers

Unlocked new integration capabilities and improved application performance by 30%

Accelerated application time to market and improved development agility

"Progress has been our primary technology partner for more than 30 years and has given us the power to grow alongside our enterprise customers. Progress technology allows us to evolve over time, and keep up with technology trends."
